

AMENDMENTS TO THE CLAIMS, COMPLETE LISTING OF CLAIMS
IN ASCENDING ORDER WITH STATUS INDICATOR

Please amend the following claims as indicated.

1. (Currently Amended) A photocatalyst-containing silicone resin composition comprising TiO₂, a Zr containing organic compound, a hydrolyzable silicone resin and a Si containing compound containing SiO₂ particles,

wherein a content of said Zr containing organic compound in terms of an oxide thereof is 0.005 to 0.1 parts by weight with respect to 1 part by weight of TiO₂, a content of said Si containing compound in terms of an oxide thereof is 0.5 to 6.0 parts by weight with respect to 1 part by weight of TiO₂, and a content of said SiO₂ particles is 0.1 to 3 parts by weight with respect to 1 part by weight in terms of an oxide of said hydrolyzable silicone resin, and

wherein the TiO₂ is dispersed in said silicone resin composition.

2. (Currently Amended) The composition as set forth in claim 1, wherein the content of said Zr containing organic compound is 0.005 to 0.02 parts by weight.

3. (Original) The composition as set forth in claim 1, wherein said SiO₂ particles comprise a colloidal silica having an average particle size of 60 nm or less.

4. (Original) A cured film obtained by heat curing the composition as set forth in claim 1.

5. (Original) A coated article having a cured film obtained by heat curing the composition as set forth in claim 1

6. (Previously Presented) The composition as set forth in claim 1, wherein the TiO₂ is uniformly dispersed in said silicone resin composition.

7. (Previously Presented) The composition as set forth in claim 1, which is homogeneous.

8. (Previously Presented) The composition as set forth in claim 1, which is a single layer composition.

9. (New) The composition as set forth in claim 1, wherein said Zr containing organic compound accelerates cross-linkage formation in the silicone resin composition to increase density of a film obtained from the silicone resin composition
